Overview

SPB TV is a highly usable IP-TV solution, optimized to run on mobile devices. SPB TV provides users with lots of Live and On-demand channels in multiple languages with easy-to-use features and settings. No subscription fee!

Software Features

Video On-Demand

SPB TV supports Video on Demand (VOD) to let the viewer control what they view and when they want to view. Unlike broadcast TV, VOD offers greater choice and interactivity.

Fast Channel Switching

Rich full screen TV player with finger-friendly on-screen "transparent" controls to switch channels while still watching current program.

Preview Picture

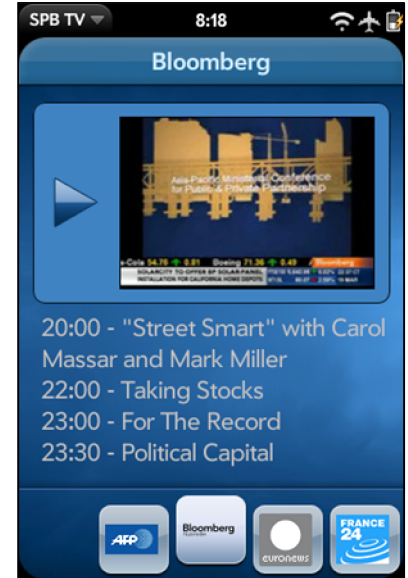

In the channel selecting panel you can see a preview picture of a selected channel displayed in inset window to help you make a decision before opening it for watching.

Network Fluctuations Support

The best picture quality regardless of fluctuations in network bandwidth for an exceptional viewing experience. You can also change the video quality from the on-screen controls in the full screen watching mode.

Integrated TV Guide

Under the preview image you can see the integrated TV guide or description of the selected channel.

Installation

Installation of SPB TV is a very simple process and takes less than five minutes to complete. The following installation guide will help you.

System Requirements

Make sure your system meets the following minimum requirements before installation.

- o Palm webOS V1.4 or higher.

Installing

To install SPB TV open App Catalog on your device and follow the instructions:

- 1- Search by name: Tap Search, enter the "SPB TV" term, and press Enter.
- 2- Tap the app name "SPB TV", and then tap Download for free.
- 3- After you downloaded the app, tap **Tap to Launch** to open it. SPB TV also now appears as an icon on the first page of the **Launcher**, so you can open it from the **Launcher** as well.

Using of SPB TV

An Internet connection is required in order to use SPB TV service. Establish your preferred Internet connection method depending on your tariff plan before starting the program. To watch smooth online TV on your device a Wi-Fi, Ev-Do, or 3G Internet connection is needed.

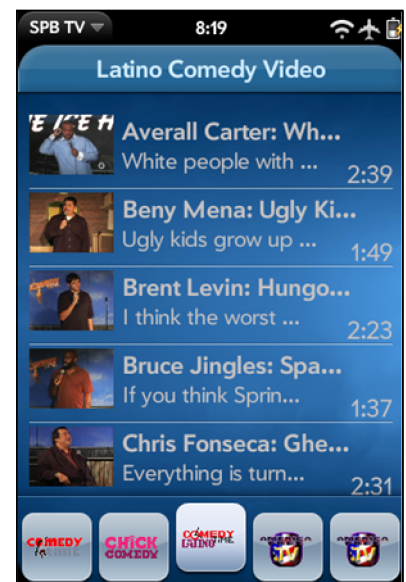

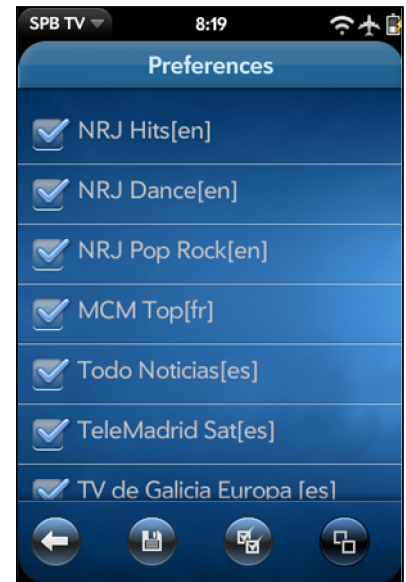

- Start by selecting your favorite channels and organizing them depending on your language and location.
 - To do that open Menu > Preferences and unselect channels that you do not want to watch.
 - Tap and hold a channel name, and then drag it to a different location to organize the channels list.
 - Tap Save button to save and exit.
- Tap the TV channel preview image to start watching in full screen mode. Under the preview picture you can see the TV guide (if available).
- Tap anywhere on the screen to display the on-screen controls at any time to quickly switch channels or change the streaming quality.

Note

The channels as seen in the application are automatically updated and changing from time to time and from country to another.

VOD Channels

Some channels provide video clips content instead of live TV. You can view each clip preview image along with its name, short description, and duration to help you choose a clip to watch.

Technical Support

This chapter contains technical support information. It includes all the information you need to assist you.

Contacting Technical Support

Please take advantage of one of the SPB Software free technical support options:

- Choose the appropriate category for your question and submit it to our support team at: <http://spb.com/support/>

Please include the following information to help us isolate the problem:

- The type of the device that you are using.
- The software name and version number. Open SPB TV and select Menu → About... to view the software name and version number (example: SPB TV, version 2.0.0).
- Any error messages that accompany the problem.
- A brief description of how we can recreate the issue.
