

A world of radio in the palm of your hand

SPB SOFTWARE, A mobile usability expert and mobile applications developer, has released SPB Radio - a high-quality Internet radio player for Windows Phones, which gives subscription-free access to an unlimited number of live streaming radio stations from all over the world. SPB Radio features a modern touch-interface with adaptive skins and on-screen controls. The application has a built-in catalog with over fifteen hundred radio stations, categorized by genre, geographical region, and language.

built-in catalogue by name of station, keeping a list of favourites, and easily adding more custom radio stations to the catalogue.

While playing, SPB Radio displays the current station's name and bit rate. SPB Radio makes it possible to enjoy the most pressing international news, live sports, talk, and entertainment shows in remarkable digital radio sound quality. SPB Radio delivers the diverse voices of the world's multitude of live radio stations directly to the speakers of mobile phones: anyplace, anytime.

Enjoying your favourites

Handset gains global popularity

ZTE CORPORATION REVEALED recently how its touchscreen mobile handset X760 is gaining popularity across the globe, from Africa to Europe, to the Americas. X760 is an intuitive, easy-to-use touch-screen handset developed and designed by ZTE. It has been widely adopted by operators and consumers because of its stylish design and rich functionality. Appealing to today's multimedia-savvy user, the X760 has a 1.3 megapixel camera and a large screen to display images, cool stylist pen to send texts, MP3 player, Bluetooth, and more.

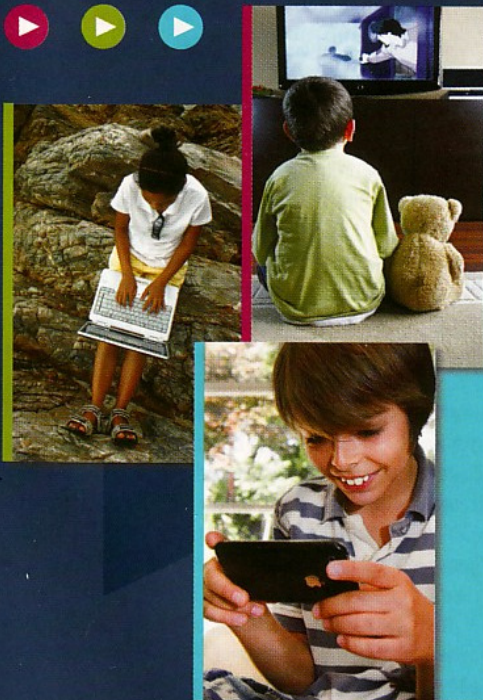

With ZTE's strong customisation capabilities, X760 has risen in popularity with international operators who want the latest products to appeal to their customers. ZTE conducted in-depth cooperation with many global and regional operators to ensure the product delivered to their customers needs. Global X760 successes include:

- Africa: X760 successfully launched into the market in late 2008 with Vodacom.
- China: Young people are flocking to the X760 because of its attractive appearance and 3D navigation design.
- Europe: X760 penetrated the market in October 2008 with purchase orders from two of France's largest operators. In 2009, X760 became widely available in European countries through T-Mobile, Orange, and Vodafone.
- South America: X760 was selected by TIM, Brazil's largest GSM operator, with a multi-million dollar purchase order. Subsequently, X760 made a huge splash in Venezuela, where 30,000 handsets were sold following a Father's Day promotion in 2009.
