

Business

The iPhone is fast becoming an important business tool and in this section you will find all the apps you need to stay productive while mobile

Price: £5.99/\$9.99 Developer: Spb Software

Spb Wallet

A secure information manager guaranteed to keep confidential data safe and secure

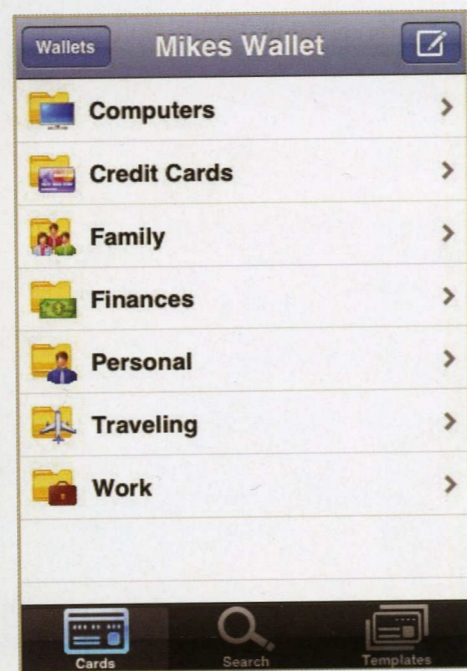

The increased incidence of identity theft means that keeping sensitive information secure is more important than ever. The only safe way to keep confidential information secure on an iPhone or iPod touch is to invest in a dedicated secure information manager.

There are only a handful of such tools that use a truly secure, but user-friendly interface and Spb Wallet is without doubt one of the

best. A relative newcomer to the digital wallet arena, Spb Wallet works on the principle of storing user-created cards in a virtual wallet. The key to the success of a secure information manager lies in the level of encryption that it offers the end user and thanks to the fact that it employs strong 256-bit AES algorithms, Spb Wallet certainly scores highly in this area. File encryption is via a key generated with your wallet

Convenient search options enable you to access confidential information quickly and easily.

The ability to organise cards into handy categories is a useful feature.

More than 60 predefined card templates are included and the online gallery gives you access to 7,000 more.

password and security features include different password strength levels, a password hint function and automatic wallet locking. The app also includes a password generator that is useful for creating strong passwords.

eWallet was the first secure information manager to put information from a card into a user interface that resembles the actual card and the old adage 'if it ain't broke don't fix it' seems pertinent as the developers of Spb Wallet have used the same concept. The app sports a number of handy features, the most notable of which is an intuitive and polished interface. Highly customisable, more than 60 predefined card templates are provided and these can be used to store passport information, bank account and credit card details, access and PIN numbers, login details and passwords. Can't find a card that meets your needs? No problem. Browse the online template gallery and you can choose from over 7,000 cool-looking cards. On a final note, if synchronisation with a desktop PC is important, then you will be pleased to learn that you can opt to download the desktop companion from www.spbsoftwarehouse.com for a reasonable price. Once configured, this enables you to sync data with your iPhone via Bonjour using Wi-Fi.

Recorder Pro

Create and manage voice memos on the go

Without doubt, the ability to be able to record voice notes enhances the functionality of any iPhone or iPod touch and Recorder Pro does a good job of letting you quickly, easily and conveniently record voice notes, reminders, dictations, meetings or interviews. Sporting a practical interface, the app has a range of features that make it suitable for personal, educational or business use. Each recording is assigned a tag with the date, time and duration. In addition, the user can assign a name for the file, an icon (handy for grouping recordings into categories) and priority status (low, medium or high). Recordings can be sorted according to the aforementioned attributes and this ensures that managing a library of voice files is a breeze. On a final note, you will no doubt be pleased to learn that this handy app lets you sync voice files with a PC or Mac via a Wi-Fi connection.
