## Overview

Spb TV is a highly usable IP-TV solution, optimized to run on mobile devices. Spb TV provides users with lots of channels in multiple languages with easy-to-use features and settings. No subscription fee!

### Software Features

#### On-Screen Control Panel

In the full-screen mode you can recall the on-screen control panel at any time by pressing the "action" button. The on-screen controls will give you quick access to the channel browsing panel, volume level controller, backlight level controller, and the exit button.

#### Integrated TV Guide

Under the preview picture you can see the integrated TV guide, pressing on it will open the full guide for the next few days of the selected channel.

#### Setting a Reminder

You can easily make Calendar reminder, from the TV guide, if you see an interesting show that you don't want to miss.

#### Battery Indicator

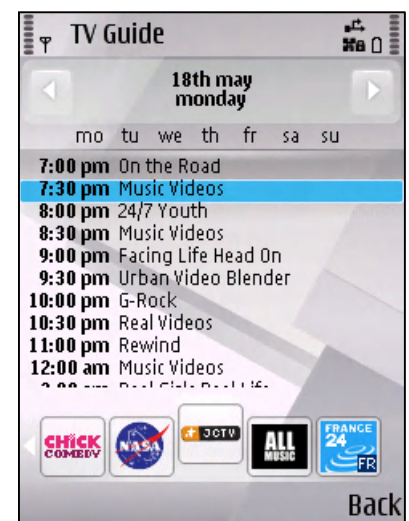

In the full screen watching mode you can see the battery level by pressing the "action" button.

#### Network Bandwidth Fluctuations Support

Spb TV automatically reduces the video quality and retains audio quality in case the Internet connection become slower.

#### Picture-in-Picture

In the channel switching panel you can see a preview picture of a selected channel displayed in inset window while the main channel is on the full-screen at the same time.

## Installation

Installation of Spb TV is a very simple process and takes less than five minutes to complete. The following installation guide will help you.

### System Requirements

Make sure your system meets the following minimum requirements before installation. Spb TV supports the following operating systems.

S60 devices running Symbian 9.1 and higher.

### Installing

Download the Spb TV distribution file to a compatible PC. Connect your device then run the downloaded setup file and follow the onscreen instructions. Or you can transfer the .sisx setup file to your phone using a cable or wireless connection and run it on your device.

### Registration

The trial version (Lite) of Spb TV has a restricted number of channels and features that are available in the registered version (full). You can use the trial version only to check how Spb TV works. In order to watch all public channels, use the Calendar reminder feature, and manage the channels list, you need to purchase the license. There is no need to re-install Spb TV in order to use the full version.

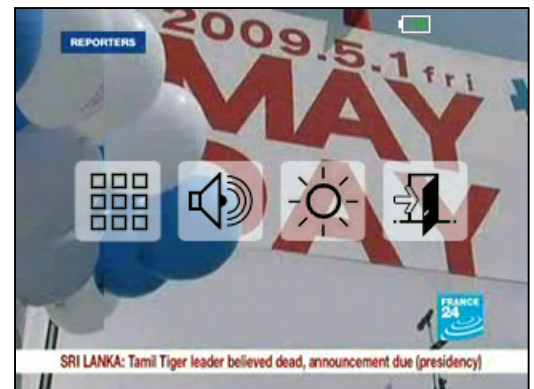

To obtain the serial number you need to purchase an Spb TV software license and you will receive your serial number by email.

## Getting Started

An Internet connection is required in order to use Spb TV service. Establish your preferred Internet connection method depending on your tariff plan when starting the program. To watch smooth online TV on your device a Wi-Fi, 3G, or cradle Internet connection is needed.

- Start by selecting your favorite channels and organizing them. To do that open **Menu > Channels...** and uncheck channels that you do not want to watch. Use the **Move Up/Move Down** menu items to organize the channels list. Start the list order with the most important channels.
- Press on the TV channel preview picture or select the TV channel icon and press the "action" button to start watching in the full screen mode. Under the preview picture you can see the integrated TV guide, pressing on it will open the full guide for the next few days. You can also access the TV guide from **Menu > TV Guide** menu item.
- In the full screen mode you can recall the on-screen control panel at any time by pressing the "action" button. The on-screen controls will give you quick access to the battery indicator (on the top-right corner), channels browsing panel (PIP mode), volume level controller, backlight level controller, and the exit button.
- You can use the following buttons to navigate through Spb TV in the full screen watching mode:
  - D-pad up/down -> volume level up/down
  - D-pad left/right -> PIP (picture in picture) channel browser
  - D-pad "action" button -> display on-screen control panel
  - Right command button -> exit full screen watching mode
  - Left command button -> display battery level
  - Number 1 button -> display volume control
  - Number 3 button -> display brightness control
  - Number 4 button -> brightness level up
  - Number 7 button -> brightness level down
  - Number 0 button -> display brightness control

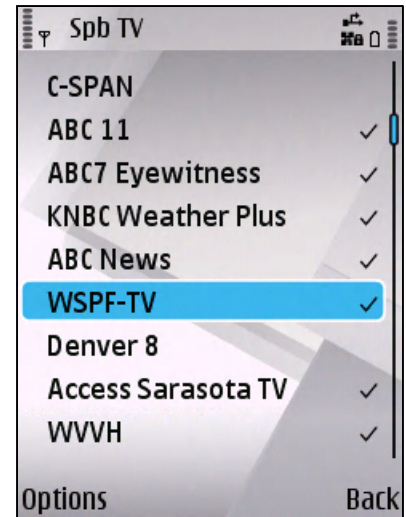

**Tip**

You can use D-pad "action" button to reset the volume\brightness level to default settings when in volume\brightness controller.

**Spb TV Options**

This chapter covers the program options dialogs in details. To access the configuration utility go to **Menu > Channels....**

Select the channels that you want to see in the channels list. Select a channel and press the **Move Up** or **Move Down** menu items to organize your favorite channels.

## Technical Support

This chapter contains technical support information. It includes all the information you need to assist you.

### About The Trial Version

The trial version (Lite) of Spb TV has a restricted number of channels and features that are available in the registered version (full). You can use the trial version only to check how Spb TV works. In order to watch all public channels, use the Calendar reminder feature, and manage the channels list, you need to purchase the license. There is no need to re-install Spb TV in order to use the full version.

To obtain the serial number you need to purchase an Spb TV software license and you will receive your serial number by email.

### Contacting Technical Support

Please take advantage of one of the Spb Software free technical support options:

- Choose the appropriate category for your question and submit it to our support team at: <http://www.spbsoftwarehouse.com/symbian/tv/support.html>
- Ask your technical question or post feature request to forum to get quicker reply directly from the developer's team. Solutions to your problems are available 24 hours a day at no cost on the Spb Club web site. You must first register as a member before using [Spb Club web support](#).

Please include the following information to help us isolate the problem:

1. The type of the device that you are using.
2. The software name and version number. Open Spb TV and select **Menu** → **About...** to view the software name and version number (example: Spb TV, version 1.0, Build 164).
3. Any error messages that accompany the problem.
4. A brief description of how we can recreate the issue.
